Members \$35;  
Non-Members \$45

The CRTC's Green Market's Committee is launching a year-long Series to highlight ways small businesses can profit (increase revenue and/or decrease costs) by going Green, that is, "Make Green by Going Green."

Each event in the series presents case studies of actual small businesses who are Greener in the bank as a result of going Green. The roundtable discussions will bring together businesses that can profit from these ideas in a forum that will encourage connections to help implement these Green opportunities.

The kick-off event will address how waste products in various industries are being converted to automotive biofuels and the impact these efforts can have on the marketing direction and bottom line of area businesses.

**Who Should Attend?**

Green Businesses	Small Businesses Going "Green"
Alternative Fuel Tech Entrepreneurs	Restaurant Association Members
Restaurant owners, managers	Fleet Operators
Food Service managers	Green/Sustainability issues policy makers
Government Representatives	Related trade association representatives
Bio-Fuel researchers/scientists
